Subject: RE: Potential Dates for upcoming HAMP related meetings

Hi Emmanuelle,

Thanks for lining up this important call and your devoted assistance resolving critical details with both IHS and USDA.

The positive position portrayed in the suggested call topics listed is that IHS is going to do something to complete this project. I have never heard confirmation from IHS Phoenix they would do anything more toward HAMP completion and many inferences to the contrary.

A commitment from IHS to complete a PER review response, in some form, in a timely manner would be an excellent outcome of the call? Or clear communication that they can't or won't perform the required scope of work to a compliance driven schedule so we can complete the project by other engineering means.

"Accentuating the positive" is a great approach, let's see how IHS Phoenix accepts responsibility or responds to it.....

Gratefully,

TIM 928 401 4000

Great thank you. Wednesday at 9am work for me. Thank you for setting this up.

In terms of discussion topics for Wednesday, I hope we can discuss:

1. Approaches to responding to RD's technical comments on the PER;
2. I plan to follow up with Mike L. to see if he can provide the sources for his treatment option cost estimates that might facilitate a response;
3. I can also provide a summary of the funding scenarios that RD had shared with me;
4. Start to develop a proposed draft agenda for our in-person meeting with RD in September.

Let me know if there are other topics. I received a message from Lionel that the Tribal council approved the HAMP electrical cost hook up. That's great news.

Thanks!

Emmanuelle

Tim,
We are all available at that time. I can reserve a conference call line. I will wait to reserve the call line until next Monday to see if Emmanuelle can make that specific time. Then, I can forward the call number to everyone.
Thanks,
James

James,
Is 9:00 AM to 10:00 AM a good time to call in?
What is the call in number and code ?
Thanks,
Tim

James + Emmanuele,

August 2 or 3 works best for me for a IHS response or "addenda" meeting.

Thanks.

Tim,

That's great news that you've made progress with the tribal council, villages and the HUC.

It looks like Brad Rea is out the week of August 28th so I'm now aiming for September 6,7 or 8th for our technical meeting with USDA. Since user rates are a key issue with USDA I think it would be best to have Brad in attendance. I plan to circle back with USDA today and send out a save the date for one of those days. Do those dates work for you and the HUC?

I also agree that we should likely delay the council meeting until after our meeting with USDA. Of the remaining council dates, I could possibly do it on the 21st of September but I can't the 18-20th. The October dates work, the only caveat is that funding a trip that first week of October gets dicey with our travel funding and I wouldn't be able to confirm any October dates until late September.

And yes let's set a date for the first week of August with HUC, IHS and EPA (phone call) to talk strategy. If you both could send me your availability for a call July 31- August 3rd that would be great.

Thanks!

Subject: Potential Dates for upcoming HAMP related meetings

Emmanuelle + James,

Significant progress and improved tribal communications were achieved today in HAMP meetings with Tribal council, village representatives and HUC Board of Directors.

The appropriate HUC representatives are available to meet in technical meetings with IHS and EPA the first week of August and USDA, IHS & EPA R9 drinking water the week of August 28. Let me know if I got these potential dates correct?

The tribal council wonders if it may be more productive to meet with IHS and EPA in late September after we have formulated an approach to USDA RD PER final comments and IHS addenda.

Thanks.
